Sustainability – Global & Local

TOWARDS
SUSTAINABLE
MINING

Reporting + Assurance

Transparent reporting of TSM performance allows the mining sector's communities of interest to take a detailed look at the sustainability performance of specific mine sites.

Each year, facilities must assess and publish their performance against the performance indicators outlined in the TSM Protocols. These results are externally verified every three years, and accompanied by a letter assurance from the company's CEO or equivalent. All of these reports and documents are published on the websites of participating members who are actively reporting on the program.

Mining associations in Canada and Finland both have their TSM Performance reports publicly available. Other partners, who are at various stages of TSM implementation, will be posting their performance reports in the coming years.

Suomalaiset ymmärtävät kaivosten tarpeellisuuden Kaivosbarometrin mukaan. Kun esitettiin väite ”Euroopassa ei tarvita kaivoksia, koska raaka-aineita voi tuoda muualtakin”, vain kuusi prosenttia vastaajista oli samaa mieltä. [#kaivokset](#) [#talous](#)
