User registration options

Suomi.fi e-Identification

- The primary option
- No separate KemiDigi username/password needed
- Available for Finnish citizens and companies only. Finnish personal identification number is required.
- Suomi.fi e-Authorization needs to be done for each user as well

Username / password

- Available for users who cannot use Suomi.fi –services.
- A company needs to acquire one KemiDigi user account first. (= KemiDigi main user for the company)
- The main user can create user accounts for other KemiDigi users in the company

How to get a KemiDigi main user account for a company

This procedure can be applied only if a company representative cannot use Suomi.fi e-Identification and Suomi.fi e-Authorization –services. As a result of this procedure the company representative (KemiDigi main user) gets username and password for KemiDigi.

- 1. An athorizing body of a company must request username and password by email: tuoterekisteri(at)tukes.fi. Please explain why Suomi.fi services cannot be used in your case.
- 2. You will receice a letter of authorization template. Fill in:
 - Company name and the Finnish Business ID
 - Name of the KemiDigi main user for your company, his/her email address and GSM number
 - Signatures of athorizing bodies of the company
- 3. Send the signed letter of authorization to tuoterekisteri(at)tukes.fi
- 4. The username will be sent to the specified email address. The password will be sent to the specified GSM number as an SMS.

How to get other KemiDigi user accounts

This procedure can be applied only if a company representative cannot use Suomi.fi e-Identification and Suomi.fi e-Authorization –services. As a result of this procedure the company representative (regular user) gets username and password for KemiDigi.

Notes about KemiDigi user accounts

- The authorizing company must have a Finnish Business ID
- authorizing body in a company shall be specified by the company policy
- company representative = KemiDigi user with access right to chemical data of the company. A company representative is not required to be a staff member of a company, externals are allowed.
- Usernames and passwords are company specific. One username can be linked to one company only.
- An extra one-time password is provided via SMS and required while signing in with username and password. (Multi factor authentication)
